Gear List

Philosophy on Gear

Whenever possible, we look for gear that improves *workflow* by being compact, portable, wireless, versatile, and battery-powered. It should be quick to load-in, quick to load-out, intuitive to operate for assistants, and require little setup and breakdown time. When casing gear, every case should be intuitive for assistants to work out of. This means making it easy to see with yellow (instead of black) dividers, color-coded labels, foam cut-outs, and sometimes organizing gear differently for unique shoots. This gear package has been curated over years of practical experience, filming on over 700 projects. It all adds up to an *extremely efficient workflow, allowing more time for creativity on set.*

Cameras

Arri Alexa Mini (sub-rental)
Arri Amira (sub-rental)
RED Scarlet-W
-Teradek Wireless Video Module
-5K Super35 Dragon Sensor
-16.5 stops of dynamic range
-ProRes & RAW recording options
-LUT Library
Sony FS7
-4K Super35 Sensor
-LUT Library
